## INSTRUCTIONS:

  - <https://duaneywadey.github.io/feanebootstrap4template/>
- Clone this Bootstrap-based template as seen on the link below.
  - <https://github.com/duaneywadey/feanebootstrap4template>
- Suppose you have a client owning **TAKOYAKI BUSINESS** and he needs a website to market his products better.
- Our goal is to **CUSTOMIZE** the Bootstrap **TEMPLATE** shown above to make it look like a website for the client's Takoyaki business. Please keep in mind that the following should be seen in the website, and it's up to you to decide for the following:
  - Brand Name
  - About Page
  - History of Business
  - Takoyaki Menu with Prices
- Please include a minimum of **SIX TAKOYAKI VARIATIONS** on the takoyaki menu page. Feel free to use any resources available online when generating information about the business. Part of your task is to do more research about Takoyaki.
- Deploy the site using **Github pages**. Please **MAKE SURE** the link is **WORKING** before submitting the document.
  - Here's a guide on how to deploy:
